WattBox 250I IPW Series
Firmware Release Notes

2.5.0.8 Release Details

- **Version:** 2.5.0.8
- **Release Date:** 31 October 2023
- **Products Affected:** WB-250I-IPW-2

Improvements

- Added support for 800 Series Trigger Accessory hardware
- Enabled a feature in OvrC to allow user to change UPS Voltage from 'Normal' range to 'Generator' range for 800 Series devices connected to OvrC UPS 1100, 1500, and 2000 rack-mount Series
- Enabled a feature for a user to be able to Factory Reset a device from OvrC
- Enabled a feature that allows the user to toggle Telnet on and off via OvrC
- Updated local UI security to enable HTTPS by default after factory reset or for units with 2.5.0.8 as factory set firmware
- Two additional password security enhancements. The new password requirements do not impact old passwords that have already been set.
  - 3 different types of characters required
  - Half or more of the string cannot be repeated or ascending characters, i.e. 1234 or 1111.
  - Password range requirement is 8 -63 characters (existing as of firmware version 2.3.0.8.)
- Added support for future WattBox hardware solutions
- Added support for future OvrC enhancements
- Made multiple cyber security updates

2.4.0.0 Release Details

- **Version:** 2.4.0.0
- **Release Date:** 01 June 23
- **Products Affected:** WB-250I-IPW-2

Improvements

- Password and username length has been increased for both the control API and Local UI. Password range requirement is now 8 - 63 characters. New password requirements do not impact old passwords that have already been set.
- Updated the power button to adhere to the power-on delay when the power button is pressed on the WattBox.
- Enhanced OvrC APIs to support future improvements.
- Added support for several future OvrC-enabled features.
- Made several cyber security enhancements.

Bug Fixes

- Fixed bug where device randomly reverts to older firmware version.
- Fixed a bug in the OvrC time configuration impacting GMT +13 regions.
- Fixed a bug where HTTPS certification may not be available until the following day.
- Added additional logic to ensure proper outlet state is followed after surge, brown out, and other rare conditions.
